## REACH Declaration

Herewith, we would like to inform that Chemical Plant „Silikony Polskie” Ltd. effectively implemented Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). The REACH Regulation requires all substances manufactured or imported in the EU in quantities of more than 1 tone/year to be registered, tested and analyzed for risk.

We confirm that we have completed the pre-registration of substances produced in our company and we intend to make the final registration before the deadline for the given tonnage range.

Polymers, which are produced by “Silikony Polskie” Ltd. are exempted from registration (according to Article 2(9) of REACH) and only the starting monomers used in the production of polymers require registration. We are ensured by our suppliers that they comply with REACH requirements for all the materials and substances we use.

Should it be decided to halt production in view of the REACH regulation or due to market changes, which is not the case at the time of this letter, we confirm our commitment to inform our customers within a reasonable period of time.
